

# THE MINISTRY OF HEALTH

1326

Pursuant to Article 34a, paragraph 4 of the Health Care Act (Official Gazette No. 150/2008, 71/2010, 139/2010, 22/2011, 84/2011, 12/2012, 35/2012 - Decision of the Constitutional Court the Court of the Republic of Croatia, 70/2012, 82/2013, 22/2014 - Decision of the Constitutional Court of the Republic of Croatia and 154/2014) at the proposal of the Croatian Institute for Telemedicine, the Minister of Health issues

## NETWORK

### TELEMEDICINES CENTERS

AND.

The network of telemedicine centers determines the required number of healthcare institutions, healthcare companies and private healthcare workers with telemedicine center approval granted by the Croatian Telemedicine Institute.

II.

Telemedicine Centers are defined as: total number of inhabitants of the Republic of Croatia, total number of insured persons of the Croatian Institute for Health Insurance, demographic characteristics of the population, population health status, social structure of the population, geographical distribution and distance of the health institutions in relation to the population, gravitating population , geographic characteristics of certain areas, traffic connectivity, availability of technical resources, availability of health resources, environmental impact on population health and economic opportunities.

III.

The telemedicine centers network consists of the main network of telemedicine centers and the extended network of telemedicine centers.

IV.

The basic network of telemedicine centers is a network ensuring equal access to health care services throughout the Republic of Croatia.

V.

For the telemedicine specialist centers in the basic network of telemedicine centers is defined for the territory of the Republic of Croatia: the telemedicine code, the name of the health institution, the address, the medical profession of the telemedicine center, the type of telemedicine services and the minimal number of healthcare workers.

A health worker in the telemedicine specialist center must be a doctor of medicine with a specialization in the field of medical profession for which the telemedicine center is established.

Exceptionally, a healthcare worker with a completed undergraduate university study from the appropriate diagnostic area may be involved in the field of diagnostic work with diagnostic devices for telemedicine services.

## YOU.

For telemedicine access centers at the primary level of health care in the basic network of telemedicine centers, it is determined for the territory of the Republic of Croatia, for the territories of the regional self-government units, ie for the areas of local self-government units: telemedicine code, county, town / settlement, telemedicine services and minimal number of health workers.

The telemedicine access centers referred to in paragraph 1 of this item use the health services of telemedicine specialist centers from the basic network of telemedicine centers.

The telemedicine access center referred to in paragraph 1 of this item may be performed by a healthcare worker who has completed undergraduate university degree or medical doctor of an emergency medicine specialist in a team with a minimum nursing medical technician.

Exceptionally, in the area where it is not possible to provide conditions for the healthcare worker referred to in paragraph 3 of this item, the prescribed work may also be performed by the nurse / medical nursing technician.

## VII.

Telemedicine Access Center for Laboratory Diagnosis, Radiology Diagnosis and Dialysis at the Health Center in the Basic Network of Telemedicine Centers is established solely for the purpose of receiving telemedicine services from that field of medical profession.

Exceptionally for the purpose of performing telemedicine services from radiological diagnostics at the Health Center, the telemedicine center may provide and receive telemedicine services from that medical field.

For telemedicine access centers referred to in paragraph 1 of this item, the territory of the Republic of Croatia, for the territories of the regional self-government unit, ie for the areas of local self-government unit: telemedicine code, counties, telemedicine services, minimal number of health workers, a settlement, the medical profession for which this center is being organized, and the name of the institution where the telemedicine access center is established.

The health worker in the telemedicine access center referred to in paragraph 1 of this point must have completed a undergraduate university study of the appropriate medical field.

## VIII.

Telemedicine Access Center for Emergency Medical Services at the Secondary Health Care Center in the Basic Network of Telemedicine Centers is established solely for the purpose of providing telemedicine services from that field of medical profession.

For telemedicine access centers referred to in paragraph 1 of this item, the territory of the Republic of Croatia, for the territories of the regional self-government unit, ie for the areas of local self-government unit: telemedicine code, counties, telemedicine services, minimal number of health workers, a settlement, the medical profession for which this center is being organized, and the name of the institution where the telemedicine access center is established. The health worker in the telemedicine access center referred to in paragraph 1 of this point must have completed undergraduate university studies from the appropriate medical field.

## IX.

For telemedicine access centers for the activity of gastroenterology, radiology, neurology, surgery, neurosurgery, neurology and transfusion medicine in the basic network of telemedicine centers at the secondary and tertiary health care level is defined for the territory of the Republic of Croatia, for the territories of the regional self-government units Areas of Local Self-Government: telemedicine center code, name of institution, name of organizational unit if there are several telemedicine centers, town / settlement, telemedicine services and minimal number of healthcare workers.

The healthcare worker in the telemedicine access center referred to in paragraph 1 of this point must be a doctor of medicine, ie in the area of laboratory and radiological diagnostics and transfusion medicine in the work with diagnostic devices must have completed a undergraduate university study in a relevant medical field.

X.

The minimum number of healthcare workers in the basic network of telemedicine centers relates to the provision of regular and urgent telemedicine services.

XI.

Institutions founded by the Republic of Croatia, a unit of regional self-government or local self-government units that establish telemedicine centers within the basic network of telemedicine centers, are obliged to provide space, technical equipment and a minimal number of healthcare workers to provide regular and urgent telemedicine services.

The provision of emergency telemedicine services in telemedicine access centers at the primary health care level is organized in County Emergency Medical Centers, ie its outlets, for the county / city / settlement areas listed in the basic telemedicine centers network.

XII.

## BASIC NETWORK OF TELEMEDIC CENTERS

### LIST OF TELEMEDIC CENTERS TELEMEDICINE SPECIALIST CENTERS

R. no.	Telemedicine center code	Name of health institution Address Medical field Type of telemedicine services	Minimum number of healthcare workers
First	TMSC-001	Clinical Hospital Center Split Department of Internal Diseases, Department of Heart and Vascular Diseases Spinčičeva 1, 21000 Split Cardiology Urgent and regular telemedicine services	Health worker: 1
